

Kushagra Saxena

SOFTWARE DEVELOPMENT ENGINEER I

forofficialkushagra@gmail.com | +91-8810892355 | Lucknow

[LINKEDIN](#) | [GITHUB](#) | [PORTFOLIO](#)

EDUCATION

SHRI RAMSWAROOP MEMORIAL COLLEGE OF ENGINEERING AND MANAGEMENT BACHELOR OF TECHNOLOGY, COMPUTER SCIENCE & ENGINEERING (DATA SCIENCE)	2022 - 2026
CITY MONTESSORI SCHOOL INTERMEDIATE CERTIFICATE — PCM + CS	2023 - 2024

EXPERIENCE

PANSCIENCE INNOVATIONS | SOFTWARE DEVELOPMENT ENGINEER I

Lucknow | May 2026 - Present

- **Teams lacked a private, fully-owned communication platform.** Designed and built **OwnChat**, a real-time messaging platform (Slack alternative) using Flutter, Node.js, and Socket.io, featuring channels, direct messaging, file sharing, voice messages, and AI-powered slash commands. Implemented persistent socket room tracking ensuring unread badges and real-time events remain accurate after idle reconnects — solving a core reliability gap in long-running sessions.
- **SEO visibility was fragmented across expensive third-party tools.** Built **OwnSEO (VisibilityOS)**, a self-hosted SEO intelligence platform with a 13-stage analysis pipeline covering technical audits, content gap detection, competitor comparison, AI visibility scoring, backlink analysis, and PageSpeed metrics — using Python, Flask, Redis, RQ, and PostgreSQL. Integrated OpenAI, Perplexity, and Google Gemini for AI-driven insights with graceful degradation when APIs are unavailable.
- **No standardised tool existed to benchmark internal service performance.** Developed **FlexiBench**, a performance benchmarking platform for measuring API throughput, response latency, and load characteristics, enabling engineering teams to establish and track performance baselines across deployments.
- **Client support required constant human availability with inconsistent responses.** Built **Botza**, an AI-powered chatbot platform enabling clients to deploy customised conversational agents trained on their own data, reducing repetitive support overhead and improving response quality and consistency.

PANSCIENCE INNOVATIONS | LLM INTERN

Lucknow | Dec 2025 - May 2026

- **Client projects spanned multiple AI domains requiring rapid, production-ready delivery.** Built and shipped multiple client-facing LLM and backend projects across healthcare, legal, and enterprise domains, demonstrating consistent delivery quality that led directly to a full-time SDE I offer.

SETUKRITE TECHNOLOGIES | AI BACKEND DEVELOPER

Lucknow, Remote | Aug 2025 - Present

- **Healthcare information was fragmented and difficult for non-technical users to navigate.** Built and deployed **Heal Trail**, an AI-powered healthcare platform using RAG pipelines and dynamic document analysis APIs, now serving 1,000+ active users.

SKILLS

PROGRAMMING LANGUAGES	Python, Java, Dart (Flutter)
FRAMEWORKS & LIBRARIES	Django, Spring Boot, Flask, Node.js, REST APIs, LangChain
AI & ML	LLMs, RAG, Prompt Engineering, Transformers, NLP, Vector Databases, Deep Learning
CLOUD & DATABASES	AWS, PostgreSQL, MongoDB, Redis, SQL, NoSQL
TOOLS & PLATFORMS	Git, Docker, Postman, Streamlit, Claude AI, Socket.io, VS Code

CERTIFICATIONS

- AI & Prompt Engineering — Edunet Foundation (Microsoft Partner)
